

GUESS THE PRICE (STD-I & II)

DATE OF ACTIVITY: 22/07/2022 (FRIDAY)

Talking to your kids about money at an early age can help them understand the value, how to save for long-term goals and how to spend responsibly.

Let's do an activity, where the children will guess the price of different objects. In this activity children will become more familiar with prices of products that they or their parents use.

Students will be shown some common items from everyday use. They will have to guess the price of the item to the nearest value.

With this thought in mind we would like the children to be aware of the family budget and the market prices of common commodities.

LET'S GUESS IT RIGHT!!!
