LEARNING OBJECTIVES:

To enable the learner to know about:

- **Different patterns**
- **How attempt any related question in the exam.**

REVISION 1

A. Choose the correct answer:

1. Rice, wheat, sugarcane, pulses, oilseeds and jute are grown in _____ soil
 - (a) red soil
 - (b) black soil
 - (c) alluvial soil

Ans. (c) alluvial soil

2. A large area of land where there is a thick growth of trees and other plants is called _____.
 - (a) Water
 - (b) Forest
 - (c) Solar energy
 - (d) Wind mill

Ans. (b) forest

B. Fill in the blanks:

1. Soil erosion can be controlled by _____.

Ans. planting trees

2. _____ has recorded the highest rainfall in India.

Ans. Mawsynram

C. Correct the sentences by changing the underlined words:

1. During summer the days are shorter and nights are longer.

Ans. During winter the days are shorter and nights are longer.

2. Coromandel coast in Meghalaya receives the highest rainfall in India.

Ans. Mawsynram in Meghalaya receives the highest rainfall in India.

D. Give answer in one word:

1. The fertile soil is carried away by wind and water to a different place. _____

Ans. soil erosion

2. A natural substance found in the Earth. _____

Ans. minerals

E. Answer the following questions in two or three sentences.

1. Difference between renewable resources and non-renewable resources.

Ans.

Renewable resources	Non-Renewable resources
Those resources that will either never run out or constantly renewed by natural processes.	Those resources which once used up, are exhausted and are either not renewed by nature or renewed very slowly over millions of years.
Example - Sun, Water	Example - Coal, Petroleum

2. Write the steps how soil is formed.

Ans.

- Rocks on the Earth are broken down into small pebbles by rain, flowing water and the roots of plants.
- These pebbles break down further to form tiny bits of soil.
- Wind, rain and rivers carry the soil to different places.
- Remains of dead plants and animals mix with the soil to make it fertile.
- It takes more than a hundred years for nature to make just one centimetre of soil.

3. What is the difference between weather and climate?

Ans.

weather	climate
<p>Weather refers to how hot, cold, rainy, windy, or cloudy it is, in a particular place at a particular time.</p>	<p>Climate refers to the weather conditions of large area taken over a long period of time.</p>
<p>Weather changes time to time, hour to hour and minute to minute.</p>	<p>Climate remains for a long time, more than 30 years and above.</p>

LEARNING OUTCOME:

The learner will be able to :

- Improve their confidence**
- Sharpen their mind and enable them to think out of their book.**
