

**SESSION** : 12  
**CLASS** : III  
**SUBJECT** : SCIENCE  
**CHAPTER NUMBER** : 8  
**CHAPTER NAME** : MAN:THE LIVING MACHINE  
**SUB-TOPIC** : THE NERVOUS SYSTEM,THE SKELETAL SYSTEM,  
THE MUSCULAR SYSTEM.

---

## CHANGING YOUR TOMORROW

---

## LEARNING OBJECTIVE :

**Learners will be able to know -**

- about the nervous system, the skeletal system and the muscular system.

# LET'S RECAPITULATE:

David and Twinkle are differ in the following statements. Tell them who is right.

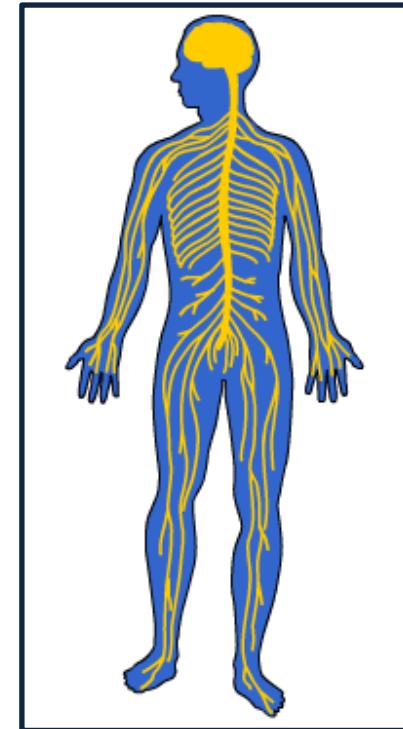

1. When we smell food, our mouth starts watering. 
2. The food that we chew, mixes with saliva and becomes hard.
3. From the stomach the food first goes into the large intestine.
4. Digested food is taken in by the blood are carried to the other parts of the body . 
5. The heart pumps the blood to different parts of the body through small and big blood vessels. 

1. When we smell food our eyes start watering.
2. The food that we chew, mixes with saliva and becomes soft. 
3. From the stomach the food first goes into the small intestine. 
4. The undigested food goes to the large intestine and it is thrown out. 
5. The brain pumps the blood into the different parts of the blood.

# THE NERVOUS SYSTEM

- The nervous system consists of the brain, the spinal cord and the nerves.
- The nervous system controls all our actions like seeing, hearing, walking and learning.

# THE SKELETAL SYSTEM

Our body is made up of 206 bones.

- These bones together make up the skeletal system.
- The bones give shape and support to the body.
- We can stand, walk and move because of our bones.

# THE MUSCULAR SYSTEM

- Our muscles along with the bones help the body and its parts to move.

# Summary

- The nervous system consists of the brain, the spinal cord and the nerves.
- Our body is made up of 206 bones.
- The bones give shape and support to the body.
- Muscular system helps in moving body parts.

## Tick the correct answer:

1. Which body system provides protection for the body system and its organs?  
a. muscular   b. circulatory   c. skeletal   d. digestive
2. Which system works with the skeletal system to move the body?  
a. muscular✓   b. circulatory   c. nervous   d. respiratory
3. Which system has the brain as the main organ?  
a. skeletal   b. muscular   c. nervous✓   d. respiratory
4. Which of these organs controls all the systems in the body?  
a. heart   b. kidney   c. brain✓   d. lung
5. The \_\_\_\_\_ system carries digested food and oxygen to all parts of the body.  
a. excretory   b. respiratory   c. circulatory✓   d. none of the above

## Circle the odd word in each set.

1. Head      **stomach**      brain      think
2. Lung      **head**      breathe      chest
3. Stomach      food      **pump**      eat
4. **Swallow**      heart      blood      pump

# LEARNING OUTCOME:

**Learners are able to know –**

- about the nervous systems, skeletal system and muscular system.

# HOME ASSIGNMENTS

Do oral questions of book page -71.
