

Chapter- 12

Time

STUDY NOTES

Let's Learn:

Morning:

- When the Sun rises, we say it is morning.
- It is time for us to wake up and start our day.
- We have breakfast and leave our homes for school or work.

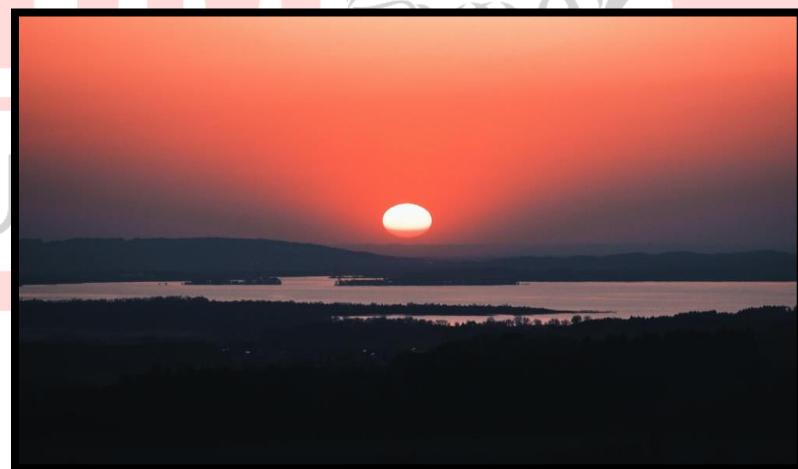

Afternoon:

- When the Sun is directly over our heads, we say it is noon.
- The shadows made by people, trees and buildings are the shortest at this time.
- Afternoon is the time when most of us have our lunch.
- It is the hottest time of the day. Children come home from school in the afternoon.

Evening:

- When the Sun goes down, we say it is evening.
- In the evening, children come home after play and people come home from work.

Night:

- When it becomes dark and the Moon and stars appear in the sky, we say it is night.
- we eat our dinner and get ready to go to bed.

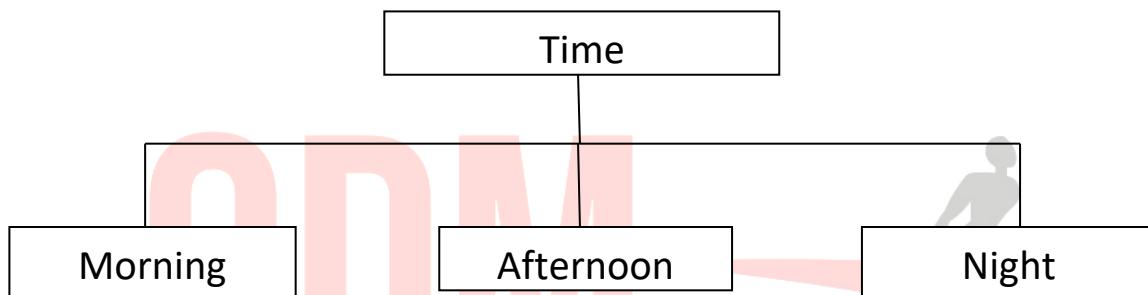

Reading a clock:

- We look at a clock or a watch to know the exact time.
- A clock has two hands—the small hand shows us the hour, and the big hand shows the minutes.
- There are 12 numbers on the face of the clock. Each number stands for one hour.
- For example, when the small hand points to 5, and the long needle points to 12, it is 5 o'clock. When the small needle points to 9 and the long hand points to 12, it is 9 o'clock.

A year:

- There are 7 days in a week. They are Monday, Tuesday, Wednesday, Thursday, Friday, Saturday and Sunday.
- There are 30 or 31 days in a month. February alone has 28 or 29 days.
- There are 12 months in a year. They are January, February, March, April, May, June, July, August, September, October, November and December.
- There are 365 days in a year.

MEMORY MAP**Let's Know More: -****Q1. Fill in the blanks.**

- a) We take _____ in the morning.
- b) A clock has _____ hands.
- c) There are _____ days in a week.
- d) There are _____ months in a year.

Let's Do: -**Q2. Tick the correct word.**

- a) When the Sun rises, it is (morning/ afternoon).
- b) We eat dinner (at night/ in the afternoon).
- c) A (bell/ clock) tells us the time.
- d) We go to school in the (evening/ morning).
- e) We go to (sleep/ school) at night.
- f) February has (28/31) days.

Q3. Answer the following questions.

- a) How do we know the time of the day?
- b) What do we call the part of the day when the Sun is directly overhead?
- c) How do we tell the exact time?
- d) How many days are there in a month?
- e) How many months are there in a year? Name the first month.

Teacher's Note:-

- Prepare a calendar of the month in the scrapbook.

Improve Your G.K.:-

- Time passes faster for your face than for your feet.
- A second is not what you think it is. Scientifically, it's not defined as $1/60^{\text{th}}$ of a minute.
- When the dinosaurs were alive, there were 370 days in a year.

Answer Key:-

Q1. a) breakfast

b) 3

c) 7

d) 12

Q2. a) morning

b) at night

c) clock

d) morning

e) sleep

f) 28

Q3. a) We know the time of the day by seeing the position of the Sun. For ex- When the Sun rises, we say it is morning.

- b) When the Sun is directly overhead, we call the part of the day as noon.
- c) We tell the exact time by looking at a clock.
- d) There are 30 or 31 days in a month.
- e) There are 12 months in a year. January is the first month.
