- a) fuel
- b) ☒ mineral
- c) Livestock
- d) forest

5. minerals are natural resources from which we get several ~~minerals~~ materials such as metals.

- a) coal
- b) Natural gas
- c) soil
- d) ☒ minerals

6. Solar energy is obtained
From sun

a) wind

b) water

c) coal

d) Solar

7. Which one among the following is not an example of a mineral?

a) gold

b) wind

c) silver

d) iron

Answer the following :

1) What do you mean by minerals?

Ans Minerals are non-renewable natural resources found in the earth we get several of minerals such as metals from it by refining.

2) Distinguish between renewable resource and non-renewable resources.

Ans Non-renewable	Renewable
Non-renewable resources are those which ones used up exhausted. These are not renewed by nature of renewed very slowly over millions of years.	Renewable resources are those that will never exhaust or ^{constantly} will get renewed by natural processes.
