

Chapter- 15

Geometry

WORKSHEET

A. FILL IN THE BLANKS :

1. An angle measuring 180° is called a Straight angle
2. The common starting point of an angle is called the Vertex of the angle.
3. A right an angle measures 90° .
4. To measure an angle in degrees, we use a protractor.
5. A triangle whose all sides are equal is called a Equilateral triangle.

B. CHOOSE THE CORRECT ANSWER :

6. A line segment has two end points
 - i) One end point
 - ii) no end points
 - iii) ☒ two end points
 - iv) none of these
7. Which of the following represents a line? Side of a square
 - i) ☒ Side of a square
 - ii) edge of cube
 - iii) axis of earth
8. A point has no length, breadth or thickness.
 - i) ☒ point
 - ii) line
 - iii) line segment
 - iv) ray
9. Identify which of the following is symmetrical?

i)

ii)

iii)

C. DO AS DIRECTED:

10. Draw the following angles using a protractor :

a) 95° b) 45°

a) $\angle ABC = 95^\circ$

Ans.

a)

95°

b)

b) $\angle xyz = 45^\circ$

11. What type of triangles are these?

Equilateral

Scalene right angle triangle

12. Find the area of the triangle.

Ans. $\frac{1}{2} \times b \times h = \frac{1}{2} \times 18^9 \times 16 = 144^3 \text{ cm}^2$

13. Name the sides, angles, and vertices of the given triangle.

Sides = 3, Angles = $\angle ACB$, Vertices = A, B, C

14. Classify each angle as acute, obtuse, right or straight.

straight

obtuse
