Q1. Do oral Q/A of Page No: 60
Q2. Root of grass family helps to conserve the soil. How?

Q1 Oral question

Choose the correct answer

1. Cactus is a desert / aquatic / terrestrial plant
2. In marshy / desert / hilly & desert the soil is clayey and sticky
3. Duckweed and water lettuce are underwater / fixed / floating plants

Q2 Root of grass family helps to conserve soil. How?

Ans Plants of the grass family possess fibrous root system and do not have a tap root system. Fibrous roots spread through the area help to hold the soil more firmly compared to the tap roots. This helps prevent washing away of soil and helps in conserving
